**Team ID :** NM2025TMID02552

**Team Size :** 4

**Team Leader :** Eanosh A

**Team member :** Girija A

**Team member :** Sethu K

**Team member :** Saravana Kumar

### **Problem Statement**

Employees in the organization need a quick and efficient way to request laptops for work. The current process is manual and prone to delays, with no dynamic form behavior to guide users or ensure accurate data collection. To address this, a Service Catalog item needs to be created, allowing users to easily request a laptop, with dynamic fields, clear instructions, and additional functionality like resetting the form if needed. The solution should also ensure all changes are tracked for governance and deployment.

### **Objective**

Design and implement a ServiceNow catalog item that enables employees to submit laptop requests dynamically with form validations, clear guidance, and governance controls, improving speed, accuracy, and accountability in the process.

### **Category**

ServiceNow System Administrator.

### **Skills**

UIPath RPA, Tanzu Application Service

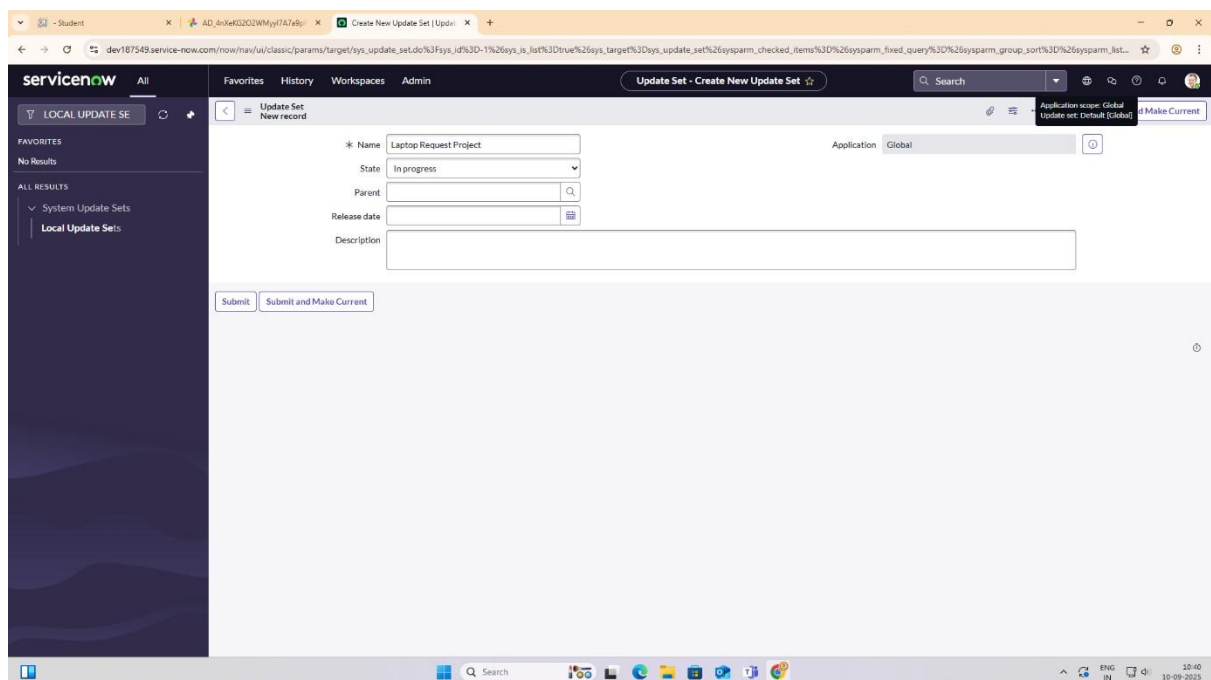

## TASK INITIATION Milestone 1: Create Local Update Set

### Activity 1: Create Update Set in ServiceNow

1. Open ServiceNow instance.
2. Click on All → search for Update Sets.
3. Select Local Update Sets under System Update Sets.
4. Click on New.
5. Fill in the following details:

Name: Laptop Request

6. Click Submit and make it Current.
7. By clicking on the button it activates the update set

The screenshot shows the ServiceNow interface for creating a new update set. The left sidebar has a search bar and a list of 'LOCAL UPDATE SET' items. The main form area is titled 'Update Set - Create New Update Set' and contains the following fields:

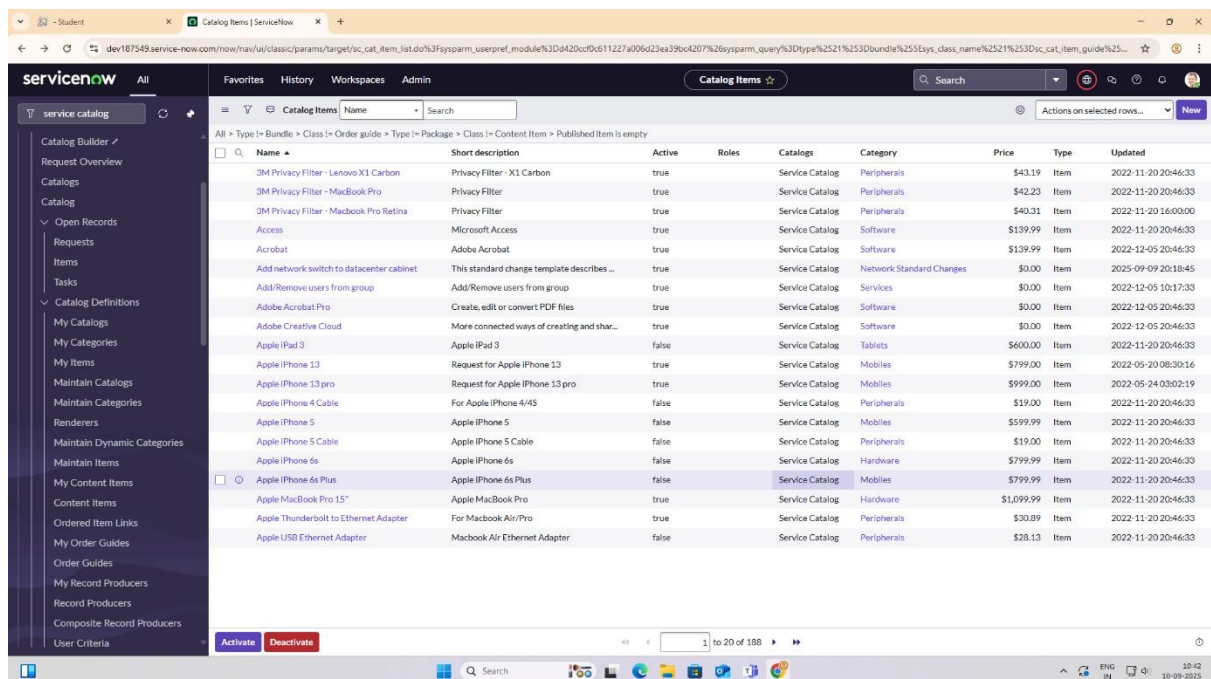

- Name: Laptop Request Project
- State: In progress
- Parent: (empty)
- Release date: (empty)
- Description: (empty)

At the bottom of the form, there are two buttons: 'Submit' and 'Submit and Make Current'. The 'Submit and Make Current' button is highlighted with a tooltip that says 'Application scope: Global Update set: Default (Global)'. The top of the page shows the ServiceNow logo and navigation tabs: Favorites, History, Workspaces, Admin.

## Milestone 2: Create Service Catalog Item

### Activity 1: Create New Service Catalog Item in ServiceNow

1. Open service now.
2. Click on All >> service catalog
3. Select maintain items under catalog definitions
4. Click on New.

5.Fill the following details to create a new catalog item

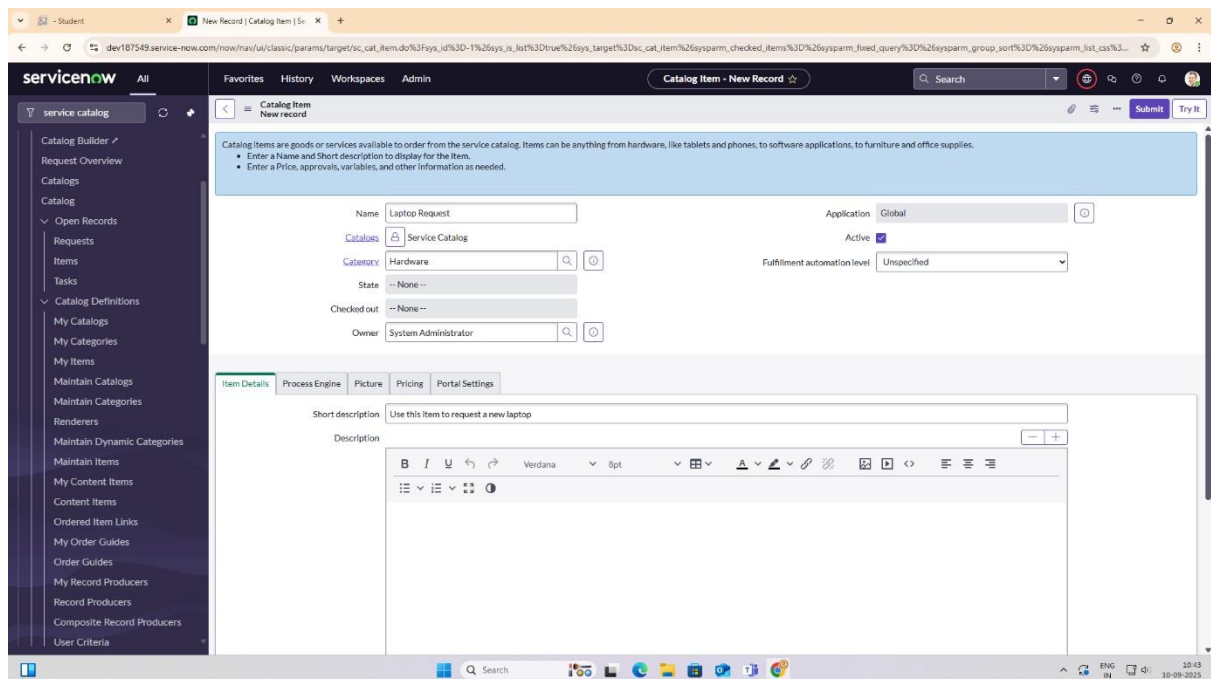

Name: Laptop Request

Catalog: service Catalog

Category: Hardware

Short Description: Use this item to request a new laptop

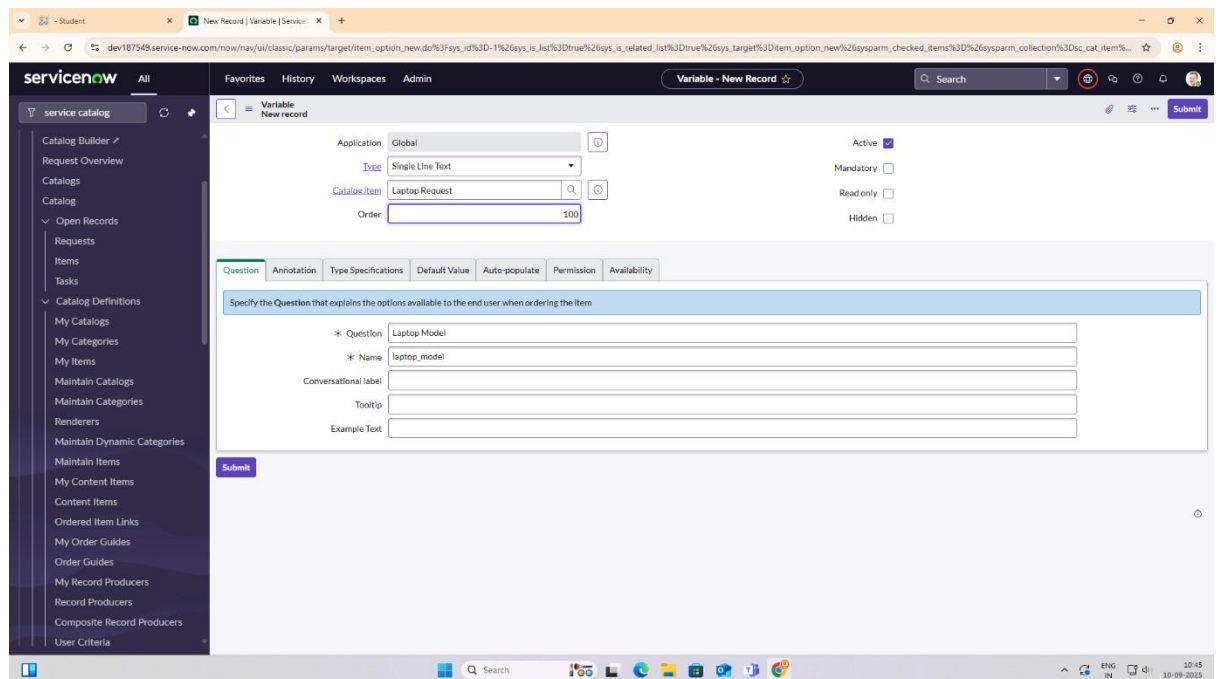

6.Click on 'SAVE'

## Activity 2: Add Variables to the Catalog Item

### Step1:

- After saving the catalog item form scroll down and click on variable(related list)
- Click on new and enter the details as below
  1. Variable 1:Laptop Model
    - Type: Single line text
    - Name: laptop\_model
    - Order:100
- Click on submit
- Again click on new and add Remaining variables in the above process

## 2. Variable 2:Justification

Type: Multi line text

Name: justification

Order:200

## 3. Variable 3:Additional Accessories

Type: Checkbox

Name: additional\_accessories

Order:300

## 4. Variable 4: Accessories Details

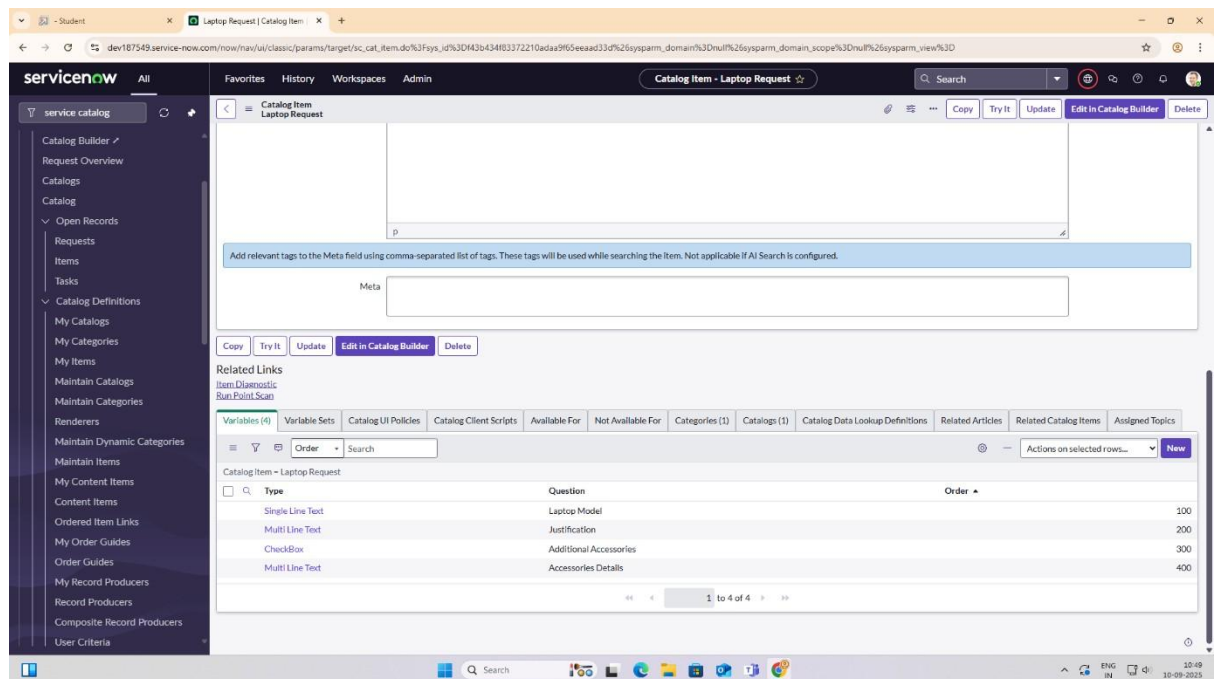

Type: Multi line text

Name:accessories\_details

Order:400

## Step2:

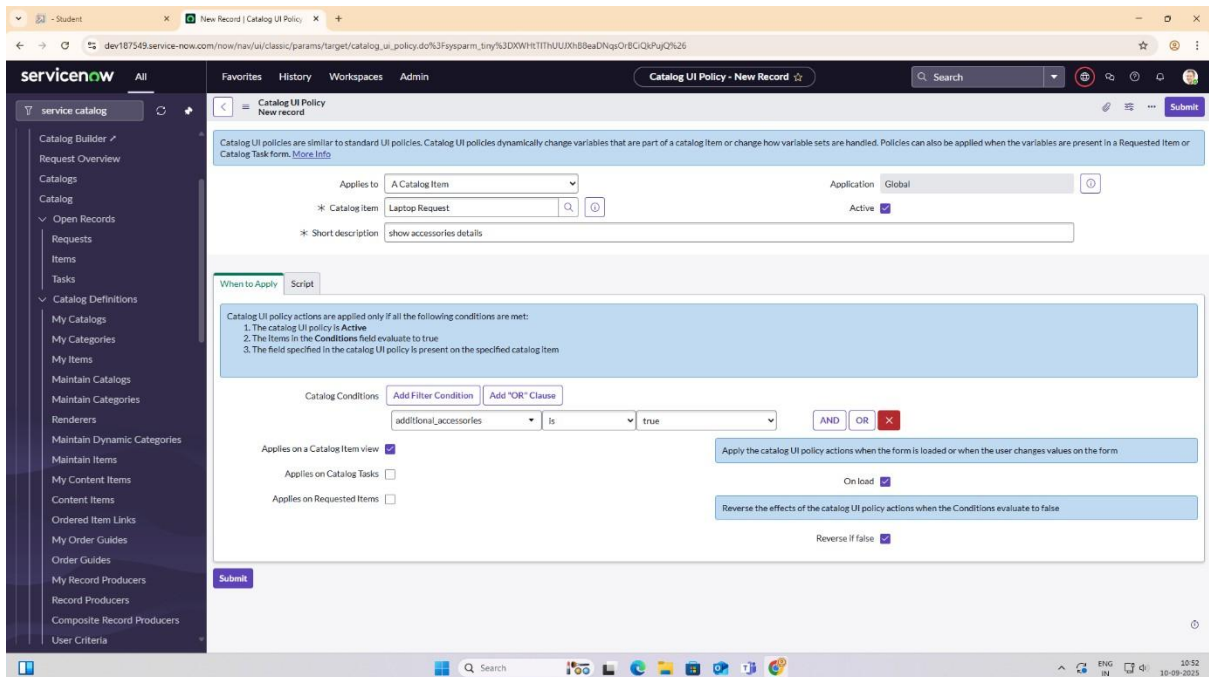

- After adding above variable which are added to newly created catalog item
- Then save the catalog item form

## Milestone 3: Create Catalog UI Policies

### Activity 1: Configure Catalog UI Policy for Dynamic Behavior

1. Click on all>> search for service catalog
2. Select maintain item under catalog definition
3. Search for 'laptop request' which is created before
4. Select 'laptop request' and scroll down click on "Catalog Ui policies"
5. In the catalog ui policies related list tab click on new
6. Give short description as: show accessories details
7. Set the Catalog Condition in the related list tab 'when to apply'  
[field: additional\_accessories, operator: is, value: true]

8. Click on **save**. (do not click on submit)

9. Scroll down and select 'catalog ui action'

10. Then click on new button

11. Select variable name as: accessories\_details

Order: 100

Mandatory: True

Visible : True

0. Click on save and again click save button of the catalog ui policy form

## Milestone 4: Create UI Action

### Activity 1: Create Reset Form UI Action

1. Open service now.
2. Click on All >> search for ui action
3. Select ui actions under system definition
4. Click on new
5. Fill the following details to create ui action

Table: shopping cart(sc\_cart)

Order:100

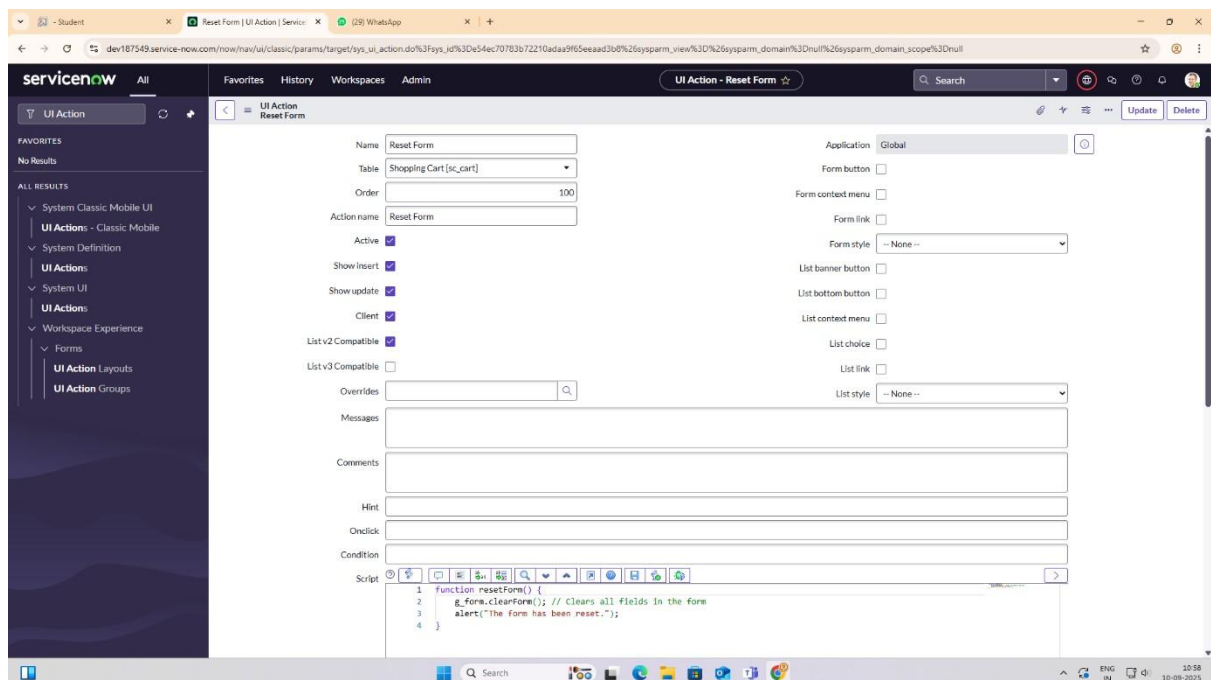

Action name: Reset form

Client : checked

#### Script:

```
function resetForm() {    g_form.clearForm(); //
Clears all fields in the form    alert("The form has
been reset.");
}
```

Click on save

The screenshot shows the ServiceNow 'UI Action - Reset Form' configuration page. The left sidebar displays the navigation menu with 'UI Action' selected. The main form contains the following fields and values:

- Name:** Reset Form
- Table:** Shopping Cart [sc\_cart]
- Order:** 100
- Action name:** Reset Form
- Active:** ☒
- Show insert:** ☒
- Show update:** ☒
- Client:** ☒
- List v2 Compatible:** ☒
- List v3 Compatible:** ☐
- Overrides:** (empty search box)
- Messages:** (empty text area)
- Comments:** (empty text area)
- Hint:** (empty text area)
- OnClick:** (empty text area)
- Condition:** (empty text area)
- Script:**

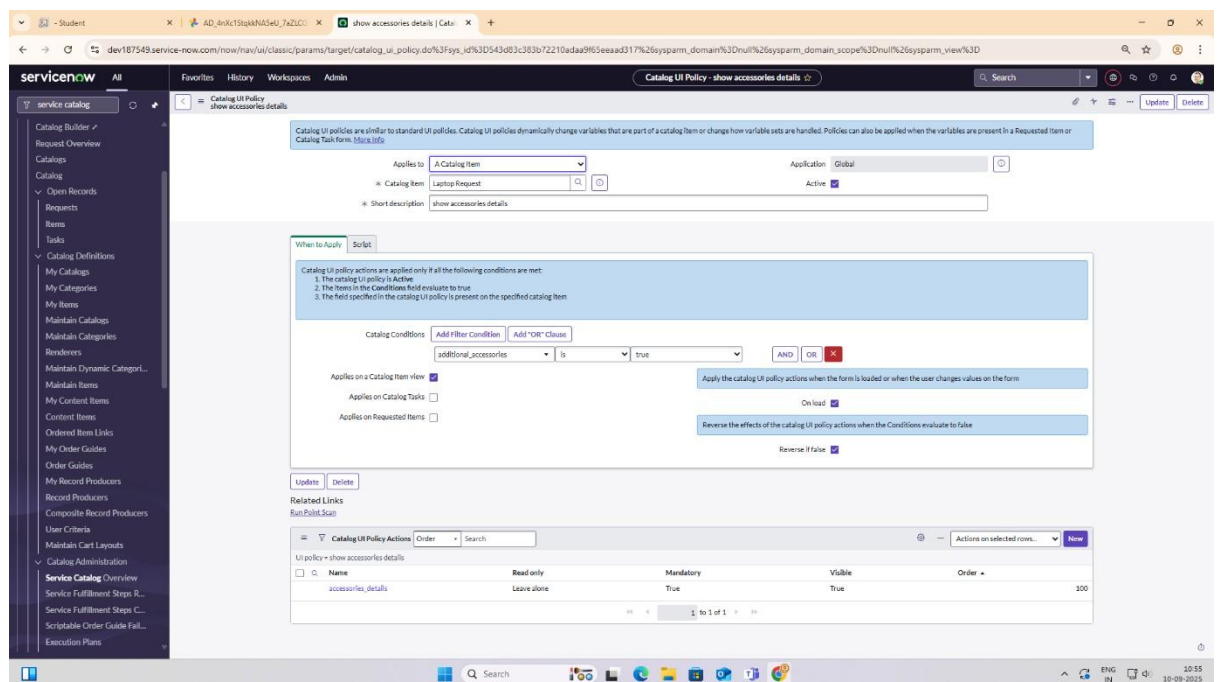

```
1 function resetForm() {
2     g_form.clearForm(); // Clears all fields in the form
3     alert("The form has been reset.");
4 }
```
- Application:** Global
- Form button:** ☐
- Form context menu:** ☐
- Form link:** ☐
- Form style:** -- None --
- List banner button:** ☐
- List bottom button:** ☐
- List context menu:** ☐
- List choice:** ☐
- List link:** ☐
- List style:** -- None --

The bottom of the page shows the Windows taskbar with the time 10:58 and date 10-09-2023.

## Milestone 5: Exporting Changes to Another Instance

### Activity 1: Export Update Set as XML

1. Click on All >> search for update sets
2. Select local update set
3. Select created update set i.e. 'Laptop Request Project'
4. Set the state to 'Complete'
5. In the related list Update tab, updates are visible which we perform under this update set.
6. Click on export to XML ,it download one file

The screenshot shows the ServiceNow interface for configuring a Catalog UI Policy. The left sidebar contains the 'Service Catalog' menu with options like 'Catalog Builder', 'Request Overview', 'Catalogs', 'Open Records', 'Requests', 'Items', 'Tasks', 'Catalog Definitions', 'My Catalogs', 'My Categories', 'My Items', 'Maintain Catalogs', 'Maintain Categories', 'Renderers', 'Maintain Dynamic Catalog...', 'Maintain Items', 'My Content Items', 'Content Items', 'Ordered Item Links', 'My Order Guides', 'Order Guides', 'My Record Producers', 'Record Producers', 'Composite Record Producers', 'User Criteria', 'Maintain Cart Layouts', 'Catalog Administration', 'Service Catalog Overview', 'Service Fulfillment Steps R...', 'Scriptable Order Guide Fail...', and 'Execution Plans'.

The main content area is titled 'Catalog UI Policy - show accessories details'. It includes a description: 'Catalog UI policies are similar to standard UI policies. Catalog UI policies dynamically change variables that are part of a catalog item or change how variable sets are handled. Policies can also be applied when the variables are present in a Requested item or Catalog Task form.' Below this, there are fields for 'Applies to' (set to 'A Catalog Item'), 'Catalog Item' (set to 'Laptop Request'), 'Application' (set to 'Global'), and 'Active' (checked).

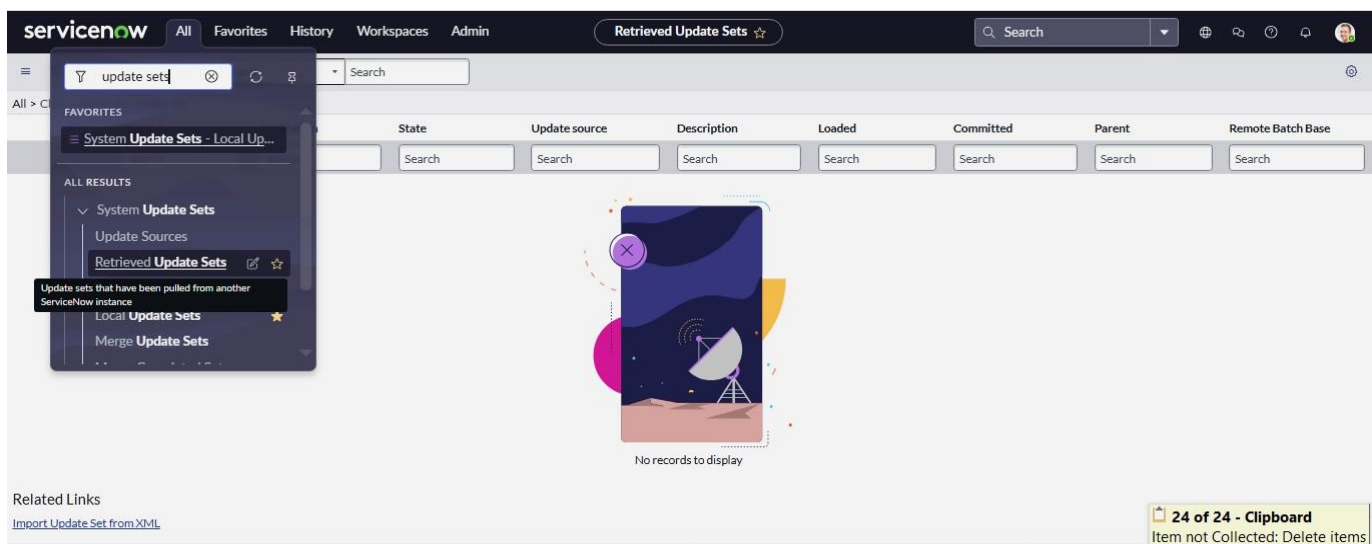

The 'When to Apply' section is set to 'Script'. It lists conditions: '1. The catalog UI policy is Active', '2. The items in the Conditions field evaluate to true', and '3. The field specified in the catalog UI policy is present on the specified catalog item'. The 'Catalog Conditions' section shows a condition: 'additional\_accessories' is 'true'. There are checkboxes for 'Applies on a Catalog item view' (checked), 'Applies on Catalog Tasks' (unchecked), and 'Applies on Requested Items' (unchecked). There are also buttons for 'Apply the catalog UI policy actions when the form is loaded or when the user changes values on the form', 'On load' (checked), 'Reverse the effects of the catalog UI policy actions when the Conditions evaluate to false', and 'Reverse if false' (checked).

At the bottom, there is a table titled 'Catalog UI Policy Actions' with columns: 'Name', 'Read only', 'Mandatory', 'Visible', and 'Order'. The table contains one row: 'accessories\_details' with values: 'Leave alone', 'True', 'True', and '100'.

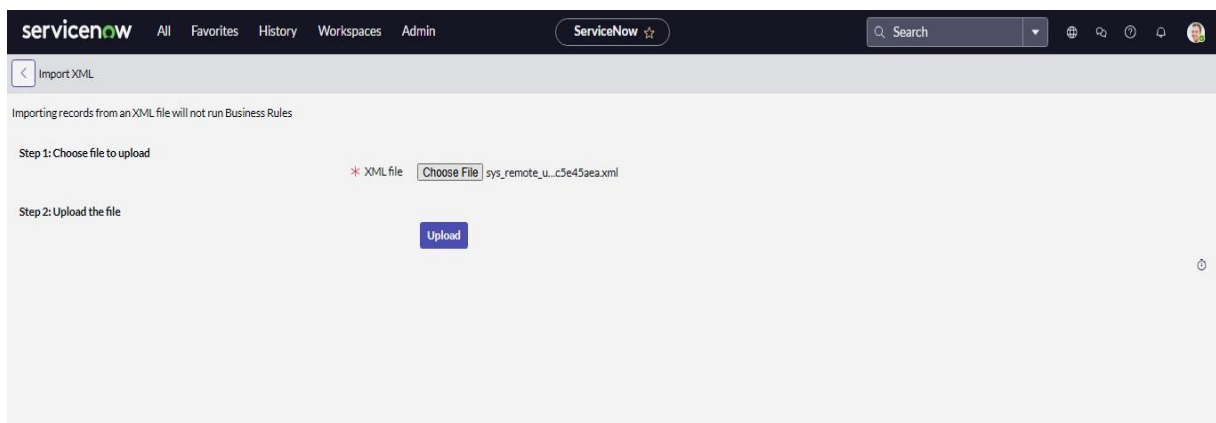

## Milestone 6: Retrieving the Update Set

### Activity 1: Import Update Set from XML into Another Instance

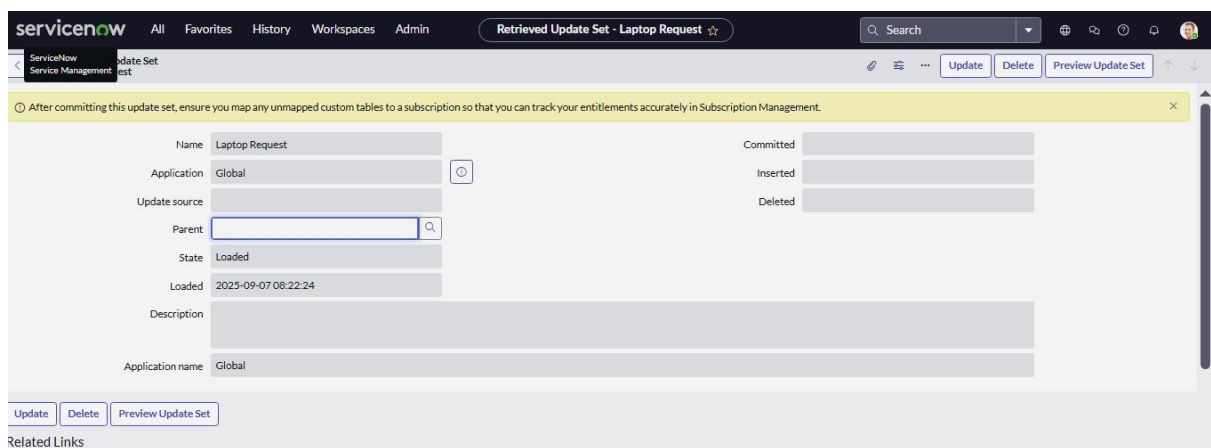

1. Open another instance in incognito window
2. Login with credentials
3. Click on all>> search for update sets
4. Select “Retrieved update set” under system update set
5. It open retrieved update set list and scroll down
6. Click on Import update set from XML

7. Upload the downloaded file in XML file
8. Click on Upload and it gets uploaded.

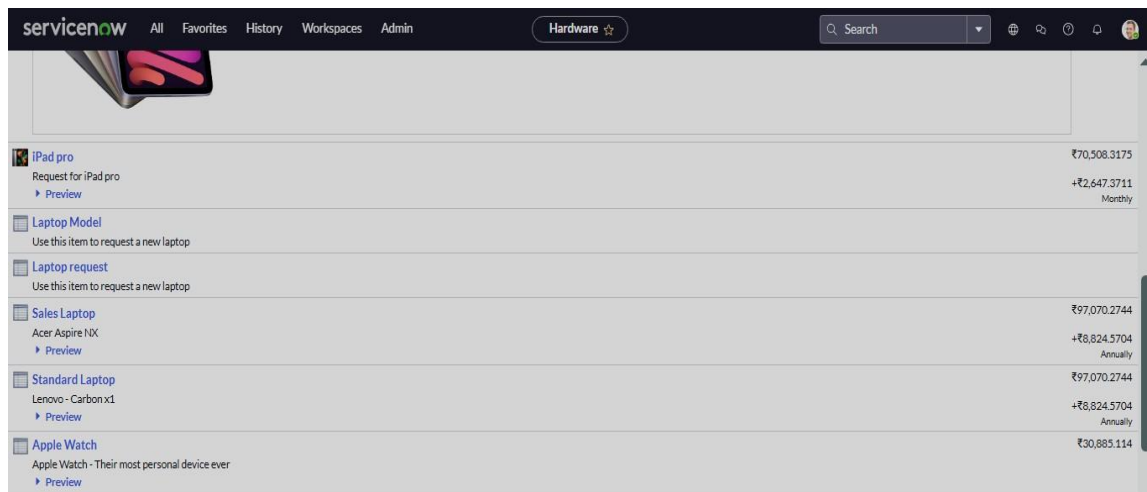

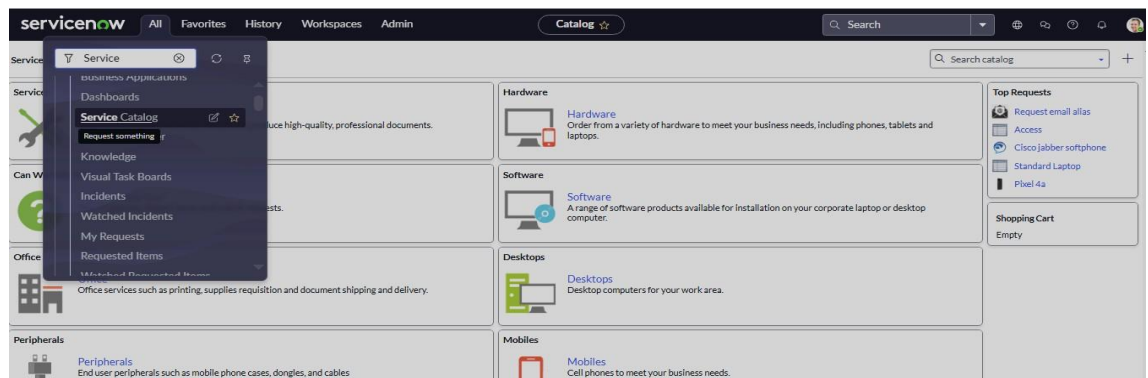

9. Open retrieved update set 'laptop request project'
10. Click on preview update set
11. And click on commit update set
12. And also see the related tab updates
13. After committing update set in this instance we get all updates which are done in the previous instance

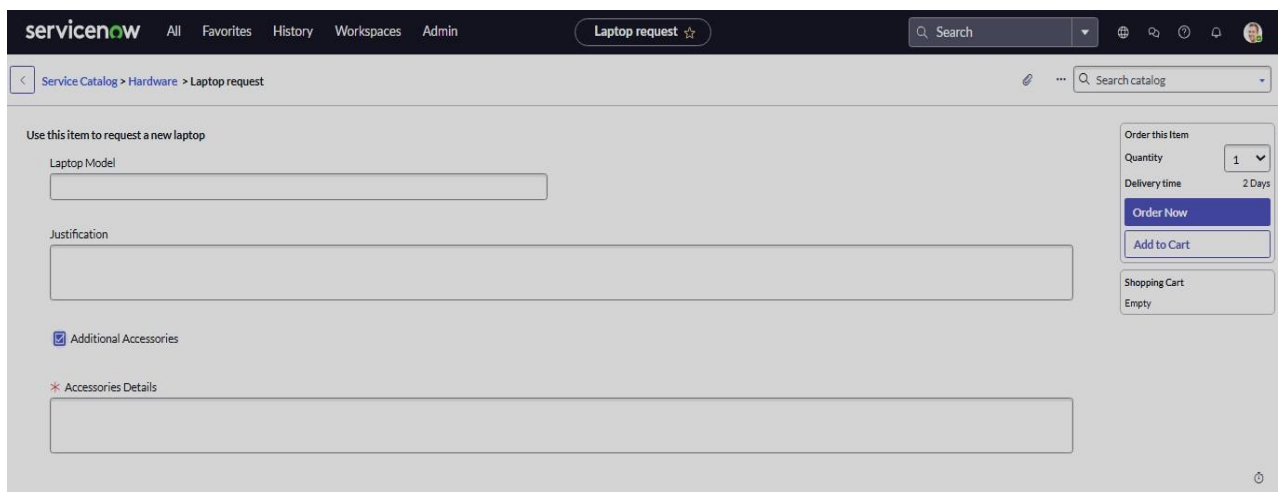

## Milestone 7: Test Catalog Item

### Activity 1: Verify Functionality of the Laptop Request Catalog Item

1. Search for service catalog in application navigator in target instance
2. Select catalog under service catalog
3. Select hardware category and search for 'laptop request' item
4. Select laptop request item and open it
5. It shows three variables only

6. As per our scenario, when we click on additional accessories checkbox then accessories details fields is visible and that should be mandatory 7. Now see the results, it fulfills our requirements

## Conclusion

The Laptop Request Catalog Item project successfully streamlines the process of requesting laptops within the organization by leveraging ServiceNow's Service Catalog capabilities. Through the implementation of a dynamic catalog item, the project ensures that users have an intuitive and user-friendly interface, reducing errors and improving efficiency. This project demonstrates how ServiceNow can be used to replace manual, error-prone processes with automated, efficient, and user-centric solutions. It not only improves service delivery but also enhances employee satisfaction by providing a modern and streamlined request experience.
